SCHEME Taman Pelangi	DISTRICT / MUKIM JB / Plentong	COMPARABLES USED 8 transactions

The first part of the paper discusses the importance of understanding the cultural context of the research. It highlights the need for researchers to be sensitive to the values and beliefs of the communities they are studying. This is particularly important in the field of education, where cultural differences can significantly impact learning outcomes. The paper then moves on to discuss the challenges of conducting research in culturally diverse settings. It notes that researchers often face difficulties in establishing rapport with participants and in interpreting their responses. To address these challenges, the paper suggests several strategies, including the use of local informants and the development of culturally appropriate research instruments. The final part of the paper discusses the importance of ethical considerations in cross-cultural research. It emphasizes the need for researchers to obtain informed consent from participants and to ensure that their research does not cause harm to the communities they are studying.

RED · ESCALATE

Declared price is 32% below the model's predicted range

The declared transaction price of **RM 480,000** falls significantly below the model's predicted range of **RM 680,000 – RM 760,000** for comparable 2-storey terrace properties in Taman Pelangi. No comparable transactions in this scheme over the past 3 years support a price at this level. This gap is not explained by local market conditions or household income data. Recommend escalating for further due diligence.

SECTION 2 — PRICE GAP SUMMARY

Taman Pelangi · 2-Storey Terrace · 2023 – 2026

MEDIAN HH INCOME · JOHOR BAHRU

RM 7,240 / mo

DOSM HIS 2022 · District level

IMPLIED PRICE CEILING

RM 650,000

At 5× annual income (standard affordability ratio)

The declared price of RM 480,000 is below even the implied affordability ceiling, suggesting the declared price could attract local buyers — which makes the deviation from comparable transacted prices harder to explain by demand-side factors alone. A price this far below market in an affordable, in-demand scheme is unusual.

ASSESSMENT

The declared transaction price of **RM 480,000** for this 2-storey terrace in Taman Pelangi, Plentong is **32.7% below the model's predicted range** and **31.3% below the median of 8 real comparable transactions** in the same scheme over the past 3 years (median RM 697,500; PSF RM 449). No single comparable transaction in this scheme has transacted below RM 660,000 in this period.

The district's median household income (RM 7,240/month, DOSM 2022) supports demand at the RM 680,000–760,000 range — this is not a price-suppressed area. The declared price does not align with any observable market explanation: there is no oversupply in the terrace segment, no income data suggesting the area is in decline, and no absence of comparable buyers.

Recommendation: Escalate. No external evidence explains a gap of this magnitude. Recommend requesting independent valuation and verifying transaction counterparties before proceeding.
